INPATIENT DISCHARGE SUMMARY

Patient Name	**James O'Connell**	MRN	HLH-552019
Date of Birth	02 Feb 1990	Sex	Male
Admission Date	14 Jan 2026	Discharge Date	16 Jan 2026
Department	General Medicine	Ward / Bed	Ward 6 / Bed 3

Diagnoses

Type	Diagnosis	ICD-10
Principal	Acute gastroenteritis, presumed infectious	A09
Secondary	Dehydration, moderate	E86.0

Procedures Performed

None. Conservative management only (intravenous fluids, antiemetics, oral rehydration).

Hospital Course

Presented with 2 days of vomiting and watery diarrhoea after a family gathering. Clinically dehydrated with mild acute kidney injury (creatinine 128 umol/L), which normalised after 24 hours of intravenous crystalloid.

Stool culture negative. Tolerating oral diet on day 2.

Condition at Discharge

Improved — tolerating diet, normal urine output.

Discharge Medications

- Oral rehydration salts, 1 sachet after each loose stool
- Ondansetron 4 mg orally every 8 hours as needed for nausea (6 tablets)

Discharge Instructions

Drink at least 2 litres of fluid a day and use oral rehydration salts after each loose stool. Wash hands carefully and avoid preparing food for others for 48 hours after symptoms stop. See your GP if vomiting persists for more than 24 hours or if you notice blood in the stool.

Follow-up

Follow-up with your general practitioner within one week if symptoms persist.
