DISCHARGE SUMMARY

Patient Name	**Thomas Eriksen**	MRN	BUH-7731902
Date of Birth	30 Jan 1968	Sex	Male
Admission Date	01 Jul 2025	Discharge Date	08 Jul 2025
Department	Hepatobiliary Surgery	Ward / Bed	Ward 22 / Bed 4

Diagnoses

Type	Diagnosis	ICD-10
Principal	Acute calculous cholecystitis	K80.0
Secondary	Choledocholithiasis without cholangitis	K80.5
Secondary	Obesity, unspecified	E66.9

Hospital Course

Mr Eriksen presented to the Emergency Department with 36 hours of constant right upper quadrant pain, fever of 38.4 C and vomiting. Murphy's sign was positive. White cell count was 15.2 x10^9/L, bilirubin 48 umol/L and ALP 310 U/L.

Ultrasound demonstrated a thick-walled gallbladder with multiple calculi and a dilated common bile duct (9 mm). MRCP confirmed two distal common bile duct stones. Intravenous co-amoxiclav was started on admission.

He underwent ERCP on day 2 with clearance of the duct, followed by laparoscopic cholecystectomy on day 4. A subhepatic drain was left in situ. Post-operative recovery was uneventful; liver function tests normalised by day 6.

Pain was controlled with oral analgesia by day 5 and he was mobilising independently. Diet was reintroduced on day 5 and tolerated well. He was reviewed by the dietitian regarding weight management.

Procedures Performed

Procedure	Date	Code
ERCP with sphincterotomy and stone extraction	02 Jul 2025	
Laparoscopic cholecystectomy	04 Jul 2025	
Removal of surgical drain and wound review	15 Jul 2025	

Condition at Discharge

Improved — pain controlled on oral analgesia, eating and drinking, wounds clean and dry.

Discharge Medications

- Paracetamol 1 g orally four times daily for 5 days
- Codeine phosphate 30 mg orally every 6 hours as needed (max 4 doses per day), 20 tablets
- Lactulose 15 ml orally twice daily while taking codeine

Discharge Summary (continued) — Patient: Thomas Eriksen

Discharge Instructions

Keep the wounds clean and dry; you may shower after 48 hours. Do not lift anything heavier than 5 kg for 4 weeks. Return for removal of the surgical drain and wound review on the date booked. Seek urgent care for fever, yellowing of the skin or eyes, or increasing abdominal pain.

Follow-up

Follow-up appointment: 19 Aug 2025 — Hepatobiliary Surgery Outpatients, Clinic 4
